**Gilders Paste™**

Peter's Metal Studio

Grainger Metal Works  
Nichols, SC

High Gloss Powder Coated  
over Gilders Paste™

Looking for a unique way to highlight or decorate your ironwork?

*Gilders Paste™* is a collection of highly concentrated colorful metallic and colored wax based pastes that can be easily applied to a project. *Gilders Paste™* can be used to color and highlight features or produce a gilded finish.

Apply with finger, soft brush or cloth in rubbing motion or by letting your imagination determine the application medium to create a unique finish!

*Gilders Pastes™* can be layered on top of one another or mixed together to create an endless finish and color palette that won't fade.

Thin with small amounts of paint thinner to transform the highly concentrated *Gilders Paste™* into paint for your projects or artwork for a stained or washed appearance.

By lightly polishing with a soft cloth, our metallic *Gilders Paste™* will produce a gilded finish. Clean up with soap and warm water or paint thinner.

Thinning will more than double coverage.

# GILDERS PASTE™

Use Gilders Paste™ on:

Picture Frames, Etched Glass, Furniture, Antique Restoration, Finials, Crafts, Embossed Molding, Miter Joints, Ornate Fretwork, Rope & Dental, Chair Railing, Curtain Rods, Ceramics, Gilding Restoration, Bisque Ware, Plaster, Home Décor Stenciling, Gessoed Surfaces, Stone, Paper, Wax, Leather, Textiles, Plastics, previously painted or any clean, dry surface.

## SUGGESTIONS

Substrate surface should be dry and clean, free of dirt, oil, grease and scale. *Gilders Paste™* can be directly applied with your finger, sponge, paint - tooth - stencil brushes, cloth, rubber stamps etc...

All colors can be thinned out to further extend, wash, stain or paint your project.

Blending *Gilders Paste™* is as easy as mixing two or more colors to match and touch up existing color schemes or to create a custom color.

Drying time varies depending on materials, thickness of application and substrate, approximately 30 - 60 minutes to the touch on dry, low porosity, debris free surfaces.

Lightly polishing metallic colors with a soft cloth, after 12 hours of drying, will produce a gilded finish.

Will accept an overcoat, such as UV solvent based stable clear lacquer, varnish, acrylic, or clear powder coating to achieve a uniform appearance where the *Gilders Paste™* was not used, or, to provide increased durability to areas where repeated.

## TIPS & TECHNIQUES

For very smooth surfaces, such as gloss paint, plastic, ceramics and furniture, it is recommended to abrade the surfaces with 0000 grade steel wool or fine sandpaper or apply a recommended primer.

Layering substrates with a solid base color and then stenciling, sponging or wiping another color over base coat can produce unique affects and blends.

Polishing base coat immediately after application with a dry cloth or slightly wet with thinner will remove *Gilders Paste™* from the relief detail and highlight depressed details. Lightly brushing *Gilders Paste™* over the top will highlight the relief details without polishing.

Store above 55°F. Apply above 60°F. If *Gilders Paste™* becomes dry, add a little paint thinner or mineral spirits, mix, and you are ready to go.

Small, 27 ml (1.5 oz.), covers over 15 sq. ft. **\$7.00** each  
Large, 92 ml (4 oz.), covers over 45 sq. ft. **\$14.00** each

## WARNING:

COMBUSTIBLE. Do not store or use near open flame. KEEP OUT OF REACH OF CHILDREN. NOT FOR USE IN HEALTH CARE FACILITIES. For further health information contact a poison control center. Use in well ventilated area. Request a materials safety data sheet when using in manufacturing. Keep in original container and lid closed to prevent product from drying out and store upside down, use a small amount of paint thinner to soften. Avoid heat, sparks, flame and other ignition sources.

(Colors may vary slightly from printed medium)
